

Project Profile – MedTech College

Customer Info:

MedTech College

**Contract Amounts
(to date):
\$200,000**

**Period of Relationship:
2006 to Present**

C-CAT, Inc. has been involved with several projects for MedTech College. Our history with MedTech College began through American Structurepoint, Inc. who provides MedTech College with architecture, general construction management and design as well as LAN assistance. Below are some summaries of work performed at MedTech College campuses located in Indiana as well as Kentucky:

MedTech College, Indianapolis 2007 and 2008

C-CAT installed a new cabling system throughout the 3rd and 5th floors during the renovation project. This system consisted of over 350 CAT 6 cables, multimode fiber and copper backbone within several telecommunication closets.

MedTech College, Greenwood 2007, 2008 and 2009

C-CAT installed a new cabling system throughout entire new school when facility was built. This system consisted of over 200 CAT 6 cables, multimode fiber and copper backbone within several telecommunication closets. C-CAT is currently working on the renovation/addition phase of this building adding more data and voice connectivity.

MedTech College, Lexington 2009

C-CAT installed a new cabling system throughout the new campus. This system consisted of over 200 CAT 6 cables, multimode fiber and copper backbone within several telecommunication closets. C-CAT also provided vga, projector and speaker cabling.

MedTech College and American Structurepoint, Inc. are very important customers to C-CAT and we are glad to have served them throughout the last several years and are proud they continue to choose C-CAT to provide communication services.
